Andy Liu

portfolio: liuandy1207.dev | liuandy1207@gmail.com | linkedin.com/in/liuandy1207 | github.com/liuandy1207

Education

University of Toronto Sept 2024 – Apr 2029 (Expected)

Bachelor of Applied Science in Engineering Science, Major in Electrical & Computer Engineering, Minor in Robotics & AI

- Coursework: Deep Learning (PyTorch), Matrix Algebra & Optimization, Statistics (R), Systems Software

University of Waterloo Sep 2023 – Aug 2024

Bachelor of Math in Mathematics/Financial Analysis and Risk Management

- Coursework: Algorithms & Data Structures (C), Tools for Software Dev. (Bash, Git, CMake), Honours Linear Algebra

Skills

Languages: Python, C, C++, Java, JavaScript, HTML & CSS, R, SystemVerilog, RISC-V Assembly
Machine Learning: PyTorch, TensorFlow.js, scikit-learn, OpenCV, Roboflow, Transfer Learning, Computer Vision
Engineering Tools: Git & GitHub, Scripting (Bash), CMake

Experiences

Embedded Systems & Machine Learning Research Intern Markham, ON

CAROBOT Learning and Research Organization May 2026 – Sept 2026, May 2025 – Aug 2025

- Enabled fully offline, browser-based access to CheeseBlocks, a block-based embedded programming tool.
- Built CheeseBlocks' data-to-inference ML pipeline: in-browser training (**TensorFlow.js**), on-device weight deployment.
- Streamlined ESP32-S3 firmware setup via a web flasher, bundling **MicroPython**, ulab, and camera support.

Tech Team Director *(Previously Project Lead)* Toronto, ON

IEEE University of Toronto Branch Aug 2025 – Present

- Devised the Smart Cane project pipeline, linking object detection & sensor readings to dynamic haptic feedback.
- Coordinated cross-functional contributions of a 5-person team on the Smart Cane Project, ensuring steady progress.
- Overhauled documentation for IEEE's technical workshop series (300+ students/year) to eliminate redundant prep work.
- Ran a **Git & GitHub** workshop for 100+ hackathon participants, teaching version control fundamentals hands-on.
- Led an **Altium** workshop for 30+ participants, teaching foundational PCB schematic design principles.

Projects

BreadCrumb - Deep Learning Project Feb 2026 – Mar 2026

- Built a **PyTorch** object-detection model to classify and count breadboard components via bounding boxes and NMS.
- Collected and labeled a custom circuit-image dataset in **Roboflow** to support supervised learning.
- Fine-tuned a pretrained ResNet18, iterating on architecture and hyperparameters to reach 97%+ accuracy.

Wannabe WALL-E - 1st Place Autonomous Vehicle Challenge Feb 2025

- Won 1st place in the UTRAHacks 2025 Autonomous Vehicle Challenge, outperforming 250+ participants.
- Built an **Arduino** autonomous robot that navigated a multi-stage obstacle course using ultrasonic and IR sensors.
- Engineered a corrective turning algorithm to compensate for a malfunctioning motor driver, averting critical failure.

Resonant Evil - Audio-Based Hardware Maze Escape Arcade Game - Hackathon Winner Feb 2025

- Won the Video Games Theme Prize at MakeUofT 2025, Canada's largest hardware hackathon (300+ participants).
- Developed an immersive audio-driven **Arduino** arcade game designed to increase accessibility for the visually impaired.
- Designed dynamic audio and haptic feedback system to guide player navigation and build tension.

Silent Night - IoT Smart Pillow - Hackathon Winner Feb 2024

- Won the Smart Home Tech Theme Prize at MakeUofT 2024, Canada's largest hardware hackathon (300+ participants).
- Designed an IoT smart pillow using an **ESP32** and sensor array to monitor sleep conditions in real-time.
- Built an automated posture-correction system micro-adjustments to improve sleep ergonomics.

Yours, Eventually - Anonymous Message-in-a-Bottle Site - Hackathon Winner Aug 2026

- Won Best Use of Reve (AI Image Generation) at SummerHacks 2026, competing against 100+ participants.
- Scaffolded full-stack & product design for a location-based site where users can drop and relay anonymous letters.
- Integrated the **OpenAI moderation API** into a 3-tier system to flag illicit messages before posting.
